A little about myself...

I am currently enrolled in the Sydney campus CoderAcademy. I am 22 years of age and currently live with my family in Maroubra. I am a pretty keen sports enthusiast and try to keep my lifestyle as active as possible. I play rugby outside of my class time and enjoy frequent exercise with my dog. My goal for this semester is to become as adaptable and independent as possible with my code writing so that I can continue to tackle the course challenges head on.

Previous Education

I had virtually zero coding experience before undertaking this course apart from the suggested pre-course work.

Coding history

I attended Newington college in Stanmore from year 7-12 and completed my studies there in 2015. I went on to enrol in a Bachelor of Science at the University of Sydney majoring in metabolism and nutrition. I was not too satisfied with my degree and felt myself struggling to take my studies seriously so I opted to defer for a year and work full-time. This gave me a lengthy breathing space where I could reassess what I actually wanted to do. I found myself drawn to coding and this day I haven't looked back!

Working in a restaurant

Lorem ipsum dolor sit amet, ius ne doming verear accommodare, amet sale minimum ne est, unum complectitur vix an. Ad viris graece consequat nam, ludus praesent aliquando cu eam. Eum eu sumo persius reformidans, nam eu legere timeam tritani. An illud reque sapientem eos, eu inductum efficiendi nam. Id usu nibh consequuntur, ei zril alienum pro, in possim quaerendum sea. Soluta deleniti an eos, an eam doctus docendi. Purto aeterno principes qui no, tale autem doctus sit et. Eam hinc errem vulputate ad, ex per tota populo scripserit. Et recteque scribentur mel, et saepe nostrud dissentiunt usu. Nemore nominavi invenire te eum, has errem fabellas ex, vis alia lucilius id.

Blog post example

- Simplistic page detailing th blog subject.
- Located through the interactive images on previous page.
- Option to navigate back to any of the home pages on the site.

Contact me page

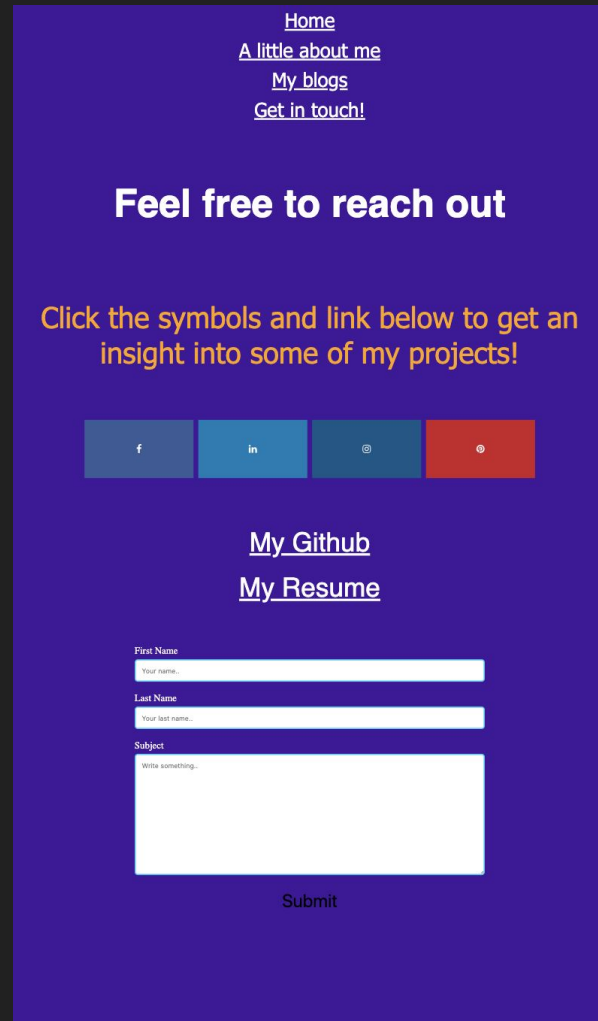

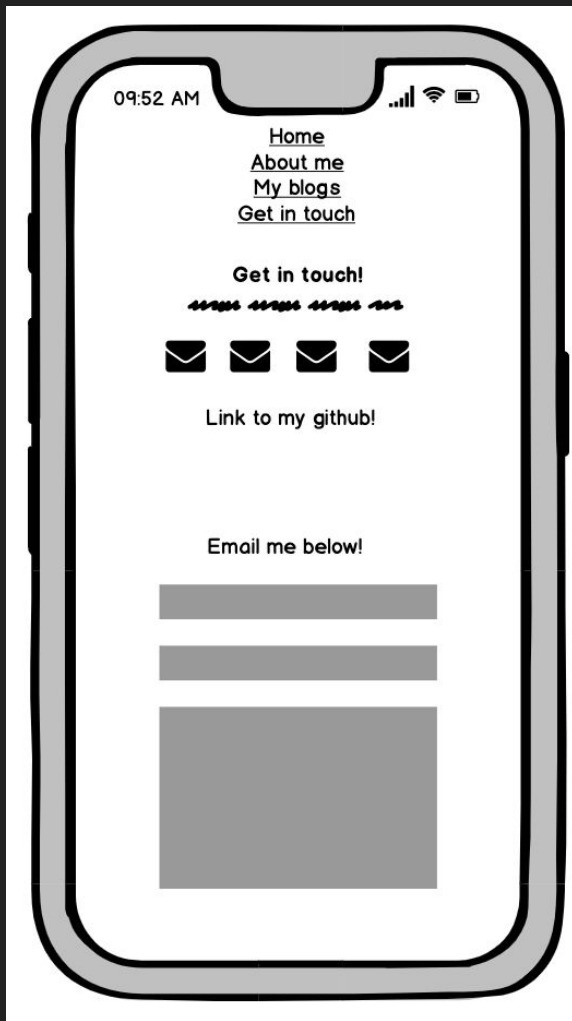

-Interactive animations to open social media sites.

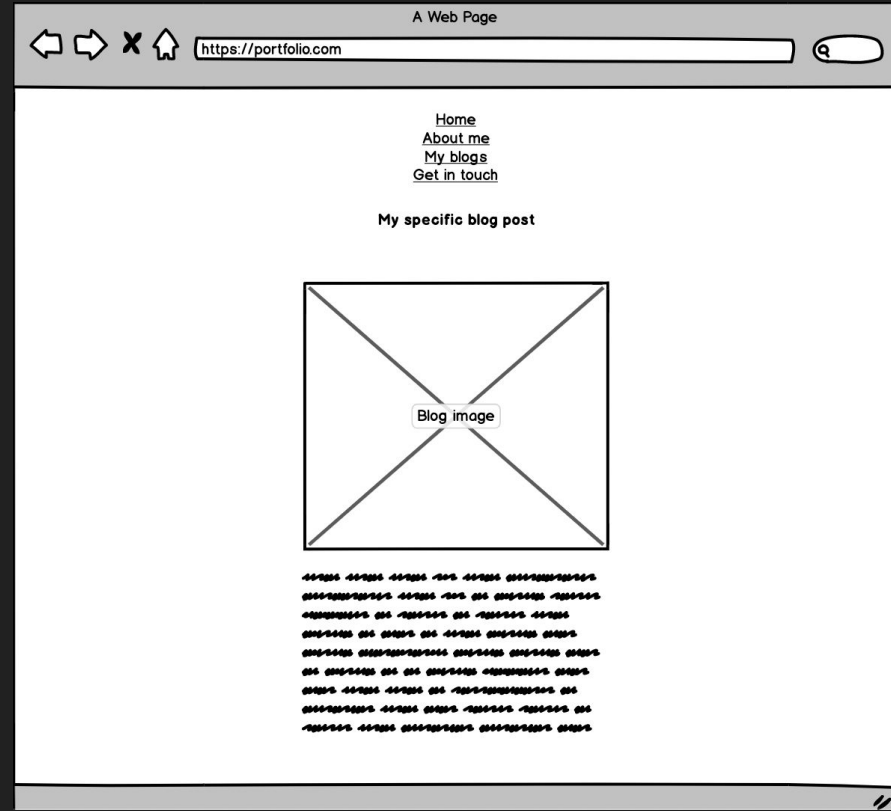

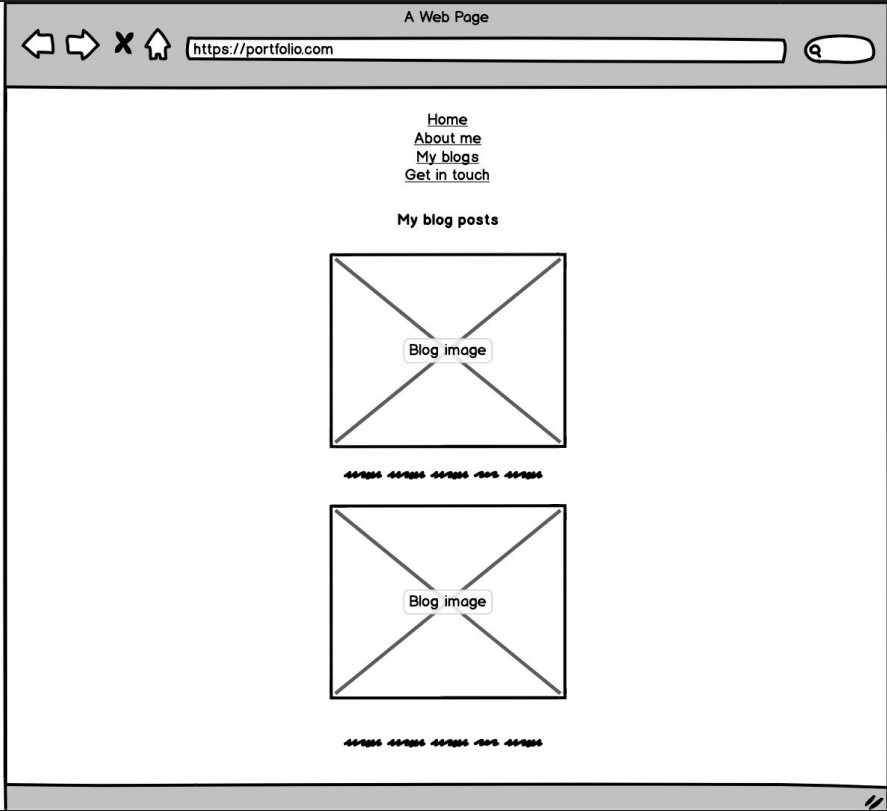

-Interactive text to open work project sites/resume.

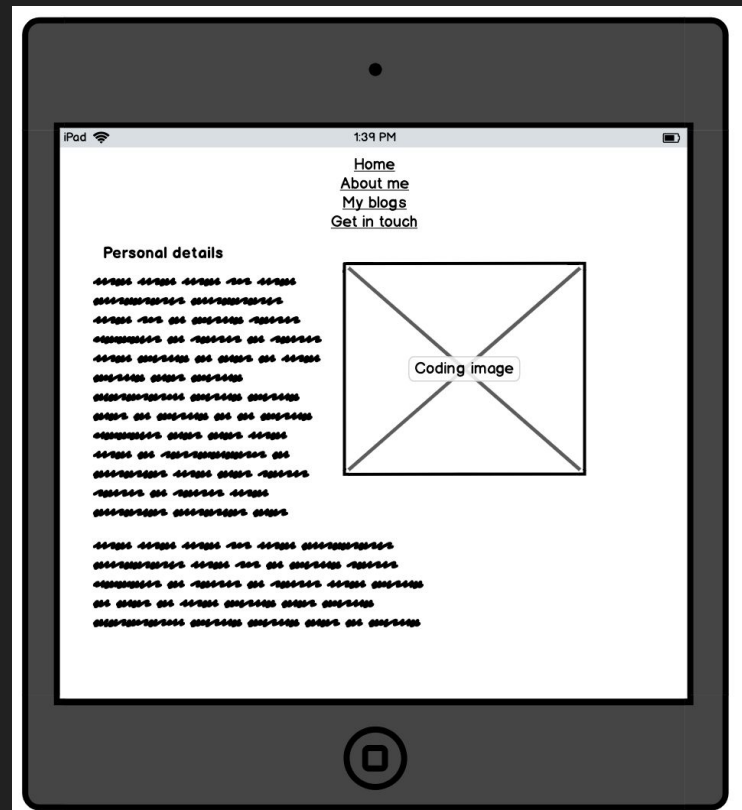

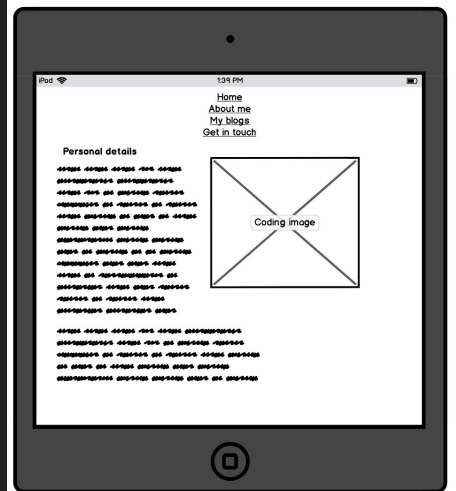

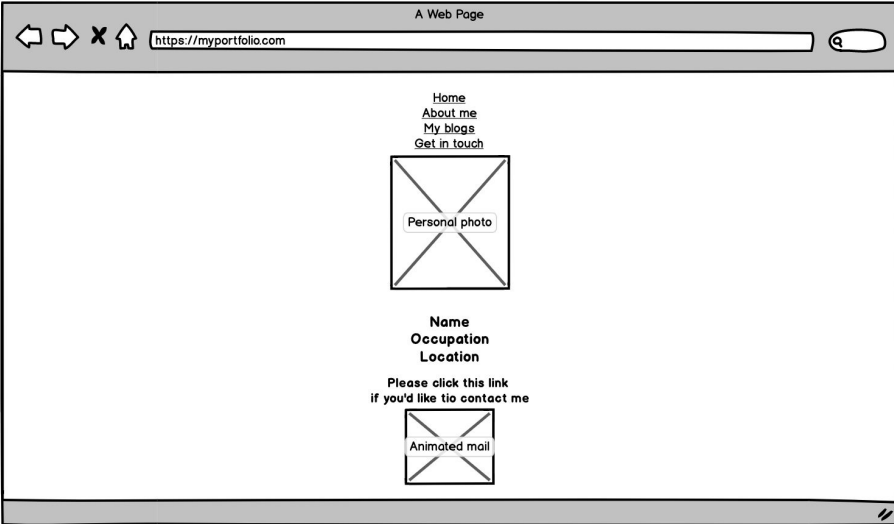

-Feedback form that records full name and any information entered.

Wireframe comparisons

A little walk through

-I decided to try and keep simplistic and modest theme throughout the site. The light coloured text on a dark background was for user readability and an aesthetic that wasn't too harsh on the eye.

-I think the only code I took from the web was the interactive social media images so I don't think I faced any real ethical issues.

-Some of the more severe challenges for me were keeping the code organised and keeping consistent with my indentation.

-Over-estimated how fast I could write the code.

-I focused on interactive images and text to take the edge off of the site and keep the user engaged. I enjoyed the interactive blogs and the seamlessness of the site.

-I hope that the style isn't frantic and the simplistic nature and the nature of the site gets across a reasonably large amount of information without it seeming tedious or overwhelming to read.
